I love these contacts! So much more comfortable than the one-month kind I had previously. They fit great and don't dry out all day. [ALLIE, LOUISVILLE, KENTUCKY]

I cannot feel them in my eyes and they do not dry out at the end of the day. [SANDRA, SEVEN HILLS, OHIO]

I really liked how they came in 0.25 powers. I am technically -7.75 but I have always been wearing -8.00 due to not having the option with other lenses. These were a better solution for my eyes as I don't need the stronger prescription. They are also very comfortable and breathable, and I don't experience eye dryness. [LAUREN, APEX, NORTH CAROLINA]

Very comfortable contacts – works well with my dry eye problem. [ELLEN, MECHANICVILLE, NEW YORK]

See Naturally®

Do your contact lenses start and **stay comfortable** all day?

**NaturalVue® (etafilcon A) Sphere 1 Day Contact Lenses with the TripleTear™ lubrication system<sup>1</sup>**

Ask us today. Enjoy better vision, naturally.

# Discover contacts that **start** comfortable and **stay** comfortable all day

Only **NaturalVue® Sphere** has the TripleTear™ lubrication system<sup>1</sup>, with 3 lubricants that are designed to work together to lock in moisture, so your contacts feel clean and comfortable. You can see clearly, naturally, all day<sup>1</sup>.

In a clinical study<sup>1</sup> that compared wearing **NaturalVue Sphere** against their current contact lenses:

- **9 out of 10** people rated their eyes feeling clean and comfortable
- **3 out of 4** agreed that the lenses provide "Natural Vision"
- **9 out of 10** people rated that the lenses are easy to use
- Patients reported more comfortable wear, morning and night

**Why NaturalVue Sphere?**

- Daily disposability for a fresh new pair every day
- All-day comfort packed with 3 moisture-loving ingredients<sup>1</sup>
- Clear vision – morning and night<sup>1</sup>
  - Added UV protection

for your busy outdoor days\*\*

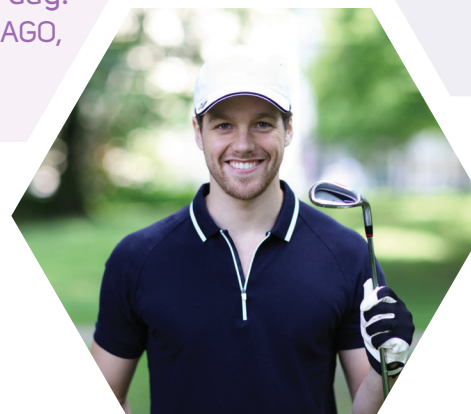

These lenses are AMAZING! They feel great all day long!  
[VALERIE, NORTH BRANCH, MICHIGAN]

Overall great comfort and my vision is clear throughout the day.  
[MICHAEL, CHICAGO, ILLINOIS]

I am a first-time contact lens user and I'm very satisfied with these lenses. They feel great all day long. The comfort of these lenses compared to my monthly are hands down the best.  
[DARNELL, HEMET, CALIFORNIA]

\*\*UV absorbing contact lenses aren't substitutes for protective UV absorbing eyewear – for example, protective UV absorbing goggles or sunglasses – because they don't completely cover the eye and surrounding area. Patients should continue to use UV absorbing eyewear as directed. Note: Long term exposure to UV radiation is a part of risk factors associated with cataracts. Exposure is according to a number of factors, for instance, environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV absorbing contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV absorbing contact lenses reduces the risk of developing cataracts or other eye problems.
