**“Fascinated by Len Design Based on The Science
of The Brain”**

NaturalVue® (etafilcon A) Multifocal 1 Day Contact Lenses are a nice new option for my solo practice.

I like to combine old-fashioned patient service with the latest technology on the market so my patients can have peace of mind.

In primary care, I am treating patients of all ages, so they have a variety of vision problems. In contact lens vision correction, I find NaturalVue® (etafilcon A) Multifocal 1 Day Contact Lenses to be a great fit for me. It's simple to use because of the one universal depth of focus design.

I am seeing patients come in and come back after they have tried purchasing contact lenses online. When they start getting presbyopic and find that their old spherical contact lenses won't do, I fit them in NaturalVue® Multifocal 1 Day Contact Lenses. My patients find this lens comfortable and easier to handle – with good movement and comfortable, all-day wear.

I would recommend NaturalVue® (etafilcon A) Multifocal 1 Day Contact Lens as a worthwhile lens for your practice. I am so pleased with the performance of the lenses that is now my first or second contact lens choice now in my practice.
